***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 are, drawn to a method of removing carcass of dead poultry throughout a poultry house, classified in class 452, subclass 198.
- II. Claims 7-19 are, drawn to an apparatus, classified in class 119, subclass 57.1.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to dispense feed to the poultry in the poultry house.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. Katz on March 08, 2005 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office action. Claims 7-19 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Katz on March 08, 2005.

The application has been amended as follows:

Cancel non-elected claims 7-19 without traverse.

The following is an examiner's statement of reasons for allowance: The claimed method of removing carcass of dead poultry randomly scattered throughout a poultry house is believed to be in condition for allowance and is being passed onto issue. The prior art of record does not anticipate nor render obvious with proper teaching(s) the claimed invention. The claimed invention includes a method of removing carcass of dead poultry throughout a poultry house with steps draw to arranging items in the poultry house to form unobstructed lanes that extend lengthwise through the poultry house, positioning a conveyor substantially parallel to the longitudinal centerline axis of the poultry house, depositing the carcasses of dead poultry found in each lane onto the floor of the poultry house at the conveyor, placing the carcasses collected on the floor of the poultry house onto the movable surface of the conveyor and conveying the collected carcasses using the conveyor. The Examiner interprets the term "poultry house" to be a conventionally known poultry house in which a plurality of chickens are fed and raised

on the floor. The prior art of record teaches various types of conveyor systems in combination with chicken raising facilities, however, most of the apparatuses would not work by depositing the dead poultry onto the conveyor, in that the conveyors travel underneath a plurality of cages. Further, conventional conveying devices in combination with poultry houses are used to deliver food to the poultry and contain no discussion of dead poultry or what to do with them. The claimed novel steps of the independent claim are believed to be patentably distinguishable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas Price whose telephone number is 703-308-2694. The examiner can normally be reached on Monday through Friday from 8:30a.m. to 5:00p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Poon can be reached on 703-308-2574. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
